

Kolbak

Kolbak is a comfortable and completely modular range, designed for maximum flexibility. With high, medium, and low back options available and a range of straight and curved units, Kolbak can create private zones or open seating areas allowing third space and breakout areas.

As with all our soft seating, Kolbak is hand made at our factory in Oxfordshire by skilled craftsmen. Seats are traditionally made using FSC® certified wood core with webbing to provide not only a comfortable sit but a product that will last

Pod solutions enable the use of LCD/LED screens as well as power and data. A central table provides meeting space for IT equipment or just a coffee.
