

## KINGSTON

Rhubarb's office seating provides a capsule collection of "good", "better" and "best" options. The Kingston is our mid-range task chair – the "better" option. As an upgrade to our entry level range the Century, the Kingston has height adjustable arms as a standard feature in addition to the 2-lever action and deep CMHR foam seat and back. This model is customisable further with an option for 3D arms as well as the standard options we offer with the Century.

The range comprises a high back, medium back and mesh back option. With our 6 year manufacturer's warranty, the Kingston has been designed with good posture first and foremost at a reasonable price point.
