

MARAN

Rhubarb's office seating provides a capsule collection of "good", "better" and "best" options. The Maran completes our capsule collection of task seating as the "best" option. As an upgrade to the Century and the Kingston, the Maran has the superior feature of a body-balance synchro mechanism, enabling the user to find the optimum position of comfort and support. The Maran also has 2D arms as standard, with the ability to adjust height and move the arm pad forward and backward. A seat slider and adjustable ratchet back complete the build of this versatile chair.

The Maran has been designed to be the chair that covers as much adaptability as possible

Features

- 2D arms as standard – height adjustable and forward & backward movement on the arm pad
- Seat slider
- Adjustable ratchet back
- 3D arm option available – same as 2D with the addition of the arms being width adjustable
- Optional headrest available
- Black 5-star base with black castors

Environments

- Training facilities
- Computer / IT suites
- Laboratories
- Offices
- Meeting rooms
