MATA

Fresh, fun and modern, the Mata is superbly engineered for strength and durability. Its 'S' shaped back provides excellent support and flexibility, making it ideal for students of all ages to get the most out of their studies. It is available in a variety of frame types with the full size range in the 4-leg and sizes 4, 5 and 6 in the reverse cantilever version.

The polypropylene shell comes in 7 standard colours and custom colours can be ordered subject to minimum quantities and longer lead times.

The Mata family includes frames for most uses: a swivel supports ICT and office-based tasks; beam mounting is available for public spaces and waiting zones, there are 4-leg and sled-base stools for lab and other counter height use, a sled base chair and, of course, the 4-leg and cantilever for classrooms to cafeterias, meeting rooms to break-out areas. We don't believe there are many chairs strong and flexible enough to spring back into shape after being driven over by a Land Rover!

Features

- Memory flex polypropylene shell
