Student Accommodation

Rhubarb Seating

Student Accommodation Projects

At Rhubarb our experience and expertise in the education sector means we understand the unique challenges of a student accommodation project. From a simple space plan, complete refurbishment or bespoke furniture design, we can successfully design, manufacture and deliver your student accommodation project.

Our products are designed and manufactured in-house, giving us complete control over the supply and manufacturing process to meet any budget and room layout. Our high standards of quality and our fast and reliable production ensures we deliver on time and to your complete satisfaction.

RHUBARB MANUFACTURING

We manufacture every product ourselves in our factory in Oxfordshire. If our standard products are not quite the right fit, we will create something unique or adjust the dimensions to meet your requirements. Our skilled manufacturing capabilities mean we have the ability to produce a single unit or scale up to produce several hundred.

We are flexible:

- Lead times – our skilled production team of sewers, upholsterers and specialist machine operators ensure that everything we manufacture is top quality and delivered on time – even to tight deadlines – without ever compromising our high standards. Tell us when you need it and we will deliver.
- Delivery schedules – we know projects do not always go to plan so we will be here to work with you to flex arrangements
- Support – whatever you need we will do our utmost to accommodate it, from product modification to warehouse storage until delivery can be accepted
- Advice – on fabrics, foams, product construction to make sure you and your clients get the best seating solutions.

RHUBARB DESIGN

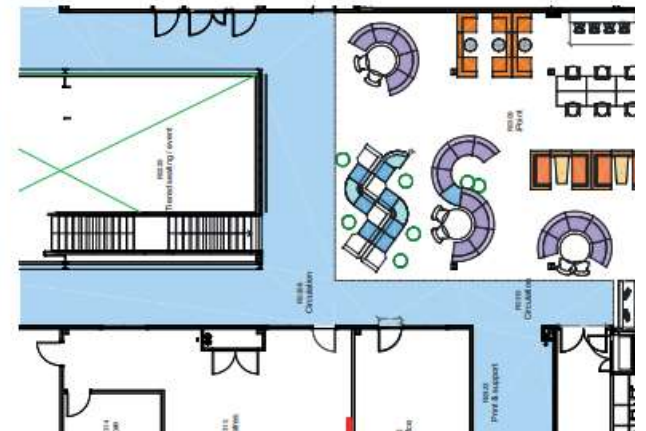

We are experts in product design and 3D space planning

Good space planning can improve the wellbeing and productivity of people using the space. It also helps to save time and money by ensuring the accuracy of the design before commencing the manufacturing process.

Our ability to space plan and create 2D plans and 3D renders of your proposed design allows you to visualise how the furniture will look and function in your space. Designing and planning ahead ensures we find the perfect solution for your project.

Our designers have expertise in both product design and space planning. This means we can fully meet your brief by creating bespoke designs that fit your requirements perfectly, working to your budget and timeframe.

Depending on the nature of your student accommodation project we can take your brief and quickly and easily provide 2D space plans to ensure you are happy with the layout, or if more detail is required, we can provide 3D photorealistic renders to walk you through the design, adding in furniture wood finishes, seating fabric colours and room features.

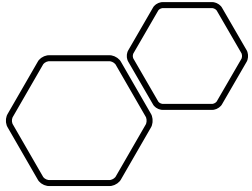

Communal Areas

We offer a range of seating suitable for student lounges & breakout areas

Rhubarb has a contemporary portfolio of tub chairs, armchairs, sofas, booths, stools and modular seating. Our ranges of modular seating offer endless possibilities for creating functional layouts to optimise the use of your space. Many of our standard ranges can be modified to suit your exact requirements, meaning that a change to our dimensions involves minimal design time - enabling our customers to create bespoke seating within budget and within a reasonable lead-time.

Modular Seating

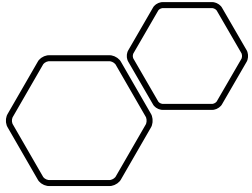

Zeta & Zeta Pod

Create different layouts and cosy study areas

Zeta Pod

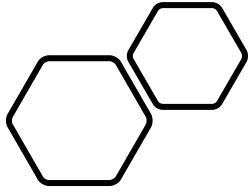

Modular Seating

Stella

Flexible & compact to create a configuration of your choice

Modular Seating

Our Projects

We have been involved in many student accommodation projects – below is a snapshot of our recent installations. We always ensure projects are delivered to a high standard and our customers are pleased with the end result. We are more than happy to provide customer references for our work.

Cardiff
University

Portsmouth University

Norwich University

Upholstery Services

We offer Upholstery Services including Re-Upholstery, Headboards, Window Study Seats, Auditorium Seat Pads, Bolsters & Cushions.

Our upholstery know-how and high-quality stitching skills means we can cater for all types of upholstery projects. Detail is important to us – we can create patterns like the diamond stitch shown to give a quality look and feel.

Safety and Sustainability

Safety, durability and sustainability are at the core of our product design priorities:

- ✓ Crib 5, anti-microbial and easy clean fabrics
- ✓ All timber from sustainable sources and FSC® certified
- ✓ High density CMHR foams
- ✓ Memberships and accreditations to demonstrate our commitments to quality & sustainability
